

CHAPTER 4

TOWN OF HENDERSON CODIFICATION

Town of Henderson Water District No.1 and No. 2 Rules and Regulations

Revised June 2, 2012 by resolution; Revised September 6, 2012 by resolution to change Water District #2 EDU's & O & M Charges .

1. Establishment of Rules, Definitions

The following rules and regulations are established by the Town Board of the Town of Henderson and every person who shall be supplied or whose property shall be supplied automatically accepts said rules and the same shall constitute a part of the contract between such persons and the Town. The word "consumer" shall be used in these rules and regulations. It shall mean the owner of the property. EDU means "equivalent dwelling unit". A single family house equals one (1) EDU. Other EDU's are assigned according to land use, building use and customer type.

2. Issuance of Bills: Quarterly collection

Water bills shall be issued quarterly. Water bills shall be addressed to the tax billing address for the parcel.

3. Current Water and Connection Charges

Water and connection charges may be changed by resolution passed by the Town Board of the Town of Henderson. All obligations of any nature due the water district which remain unpaid as of October 1 of each year may be charged by the Town as special assessments and collected as the same.

4. Permits/Request for New Service

Application for new water service from the street main to the curb stop (where the shut-off valve will be located) must be submitted forty-eight (48) hours prior to commencing work.

5. Taps

A separate tap in to the main is to be required for each lot supplied with water. The tap is the responsibility of the consumer and all costs will be borne by the consumer. The District will only oversee and inspect the tap process. Tapping can only be done by an experienced contractor, which shall be verified by District.

6. Cost of Installation

The cost of new installations will be paid entirely by the owner. The meter and touchpad must be purchased from the Town of Henderson and will be billed on the first water bill. The cost of these items will be the same cost incurred by the Town of Henderson when such items are purchased.

7. Pipe Specifications

The pipe from the curb stop to the consumer meter shall be 3/4" Type K copper, 1" plastic or other approved material with compression fittings. The Town Board may hereafter revise such pipe specifications.

8. Laying of Service Pipes & Notification to the District

Service pipes shall be laid not less than sixty (60") inches below the surface of the earth unless equivalent frost protection is provided which is acceptable to the District. This applies to the established grade where it has been fixed. No trench shall be backfilled in any manner before a representative of the District makes inspection for leaks and clearances.

9. Trench Openings and Backfilling

The trench opening by the owner or contractor for tapping onto the service shutoff for the installation of the water line shall be of sufficient size and have the proper safety precaution to accommodate the work to be accomplished. The owner or contractor shall make alterations to the opening as instructed by the District representative. The backfilling of the trench shall be made by the owner or the contractor. The material used shall be sand in the immediate area around the pipe to a depth of one (1) foot. The remainder of the trench will be original material, tamped every eight (8) inches until the trench is backfilled to original grade.

10. Maintenance of Service Pipes

The district will maintain all the service piping from the main to each structure as long as the property is within the District or if installation was inspected when installed after the close of construction in that district. The owner within the District is only responsible for what is inside there building. Outside District users are responsible for maintenance on all piping.

11. Backflow Preventers

Where required by the New York State Department of Health Sanitary Code, Part 5, or local ordinance, a backflow preventer of a suitable type that is currently approved by the Health Department must be installed.

A. Well Separation Inspection: Should the records indicate that at the time of connection to the public water supply a choice is made to retain the existing well on a property, the NYS Department of Health requires an inspection of the operation of both water supplies which is required to verify that the well is still in operation and remains separate from the public water supply. An inactive well must be abandoned per NYS Department of Health regulations. There is no charge for the first inspection and a fee of \$40 is due for each subsequent inspection. If there is maintenance of an active well, an access easement shall be granted by owner to the District to permit entrance to inspect the well and to make future owners aware of the easement associated with a private well. New York State Sanitary Code, Part 5 ensures the safety of public water through the enforcement of the said code. An inspection shall occur every three (3) years or more often as may be required. An inspection shall also occur whenever ownership of such premises changes.

12. Cross-connection Control

No consumer is allowed any cross-connection from any other source of water under the rules and regulations, Part 5, of the NYS Department of Health. When such cross-connections are found, the water from the District water system shall be turned off immediately to prevent contamination of the district water system. The consumer shall be requested to provide a cross-connection control device as required by District upon discovery.

13. Operation of Curb Stop Water Shutoff

No curb stop shall be operated by anyone other than a representative of the District.

14. Operation of Fire Hydrants

No fire hydrant shall be operated by anyone other than a representative of the District. The fire department may however, use the hydrants for the purpose of fighting fires, announced fire fighter training exercises, or to assist the District.

15. Meters

- A. All water services except those used exclusively for fire purposes shall be metered. Meters shall be obtained from the District and all repairs and testing must be made by the District.
- B. All meters at the time of initial construction of the water system shall be provided by and maintained by the District at no cost to the consumer. Damage to the meter not caused by the District is the responsibility of the owner, including all cost for its removal, repair, testing and replacement.
- C. Meters shall be as specified by the District. The consumer is responsible for the costs of any meters required after the initial construction of the system.
- D. Meters removed for seasonal purposes will be billed at a minimal of \$45.00 per hour at the time of removal and charge shall however include both the time incurred for the removal and re-connection process. Additional charges may also be incurred which may be, but not limited to: requested turn on and/or turn off at curb or in home; service, repair and/or replacement of meters and/or parts; and inspections necessary for new and/or old installations.

16. Testing and Repair of Meters

The District shall conduct periodic tests on all meters so as to maintain the meter in proper working condition. The District will pay all costs for routine testing, maintenance, repairs and replacements. The District will have all meters larger than two (2) inches in size tested every four (4) years or as needed.

17. Location of Meters

All water meters shall be placed in an accessible part of the building or basement so that they may be read or removed. When placed in a pit such a pit shall comply with specifications established by the District. Just inside of the basement or pit wall into which the service pipe extends, a shutoff valve shall be placed ahead of the meter. On all water meters two (2) inches and larger, a backflow preventer shall be installed when connecting equipment to a building which has a potential of back feeding contaminants into the system as determined under the District specifications. (All new, repaired, or replaced services, two inches (2") or larger shall have a Department of Health approved backflow prevention device after the water meters.) All water meters not in a heated environment or meter pit shall be removed annually to eliminate freezing.

18. Breaking of Seals

All water meters, when set, shall be sealed to prevent tampering. No person other than an authorized employee of the District shall break said seals or remove said meter.

19. Inspections

Any employee of the District, upon proper identification, shall have the right to enter any premises where municipal water is being supplied for the purpose of inspecting, installing, removing or reading a meter, plumbing and fixtures of the water service and all work in connection with the service.

20. Liability

In the event of an emergency, including but not limited to breaks in a water main, the District shall not be liable for any damages which may result to any person or premises from the shutting off of the water from any main or service for any purpose whatsoever, even in cases where notification is not given.

21. Fire Prevention Services (Sprinkler Systems)

Where on-premises fire prevention services are permitted, the entire cost of materials, installation and maintenance of the service from the main to the premises and within the limits of the premises shall be borne by the consumer. The consumer shall pay a connection charge as listed. Failure to make proper

repairs of the system, after due notice, shall result in the water service being turned off. When the consumer desires to conduct flow tests or to make repairs to the fire service system, except in emergencies, the consumer or the representative of the consumer shall give the District forty-eight (48) hours advance notice before commencing such testing or repairs. The charges per billing are as follows:

A. SCHEDULE OF QUARTERLY FEES FOR SPRINKLER SYSTEMS

Size of System (by inches)

1 1/2 and 2	\$ 6.00
4	\$11.00
6	\$16.00
8	\$21.00
10	\$26.00

B. SPRINKLER SYSTEM MALFUNCTIONS

Any time a malfunction occurs in a sprinkler system, and any Town of Henderson Water District #1 employee has to be on premises for turn off/turn on, repairs, replacements, etc., the owner shall be billed at the rate of \$45.00 per hour for any and all services as well as the cost of any and all parts required to fix the system.

C. SPRINKLER SYSTEM WATER USAGE

When a sprinkler system malfunctions, and unmetered water is discharged, the Water District Operator will provide the Water Clerk with an "estimated usage figure" which will determine the fee to be charged the customer based on a cost of \$5.00 per 1,000 gallons of water consumed.

22. Abandonment of Services

When a building is torn down and water service is no longer required, the owner of the property shall contact the District to terminate the water service.

23. Estimated Use

If a meter fails to accurately record the amount of water used, or the meter cannot be read, the consumer shall be charged at the average daily consumption of the last 4 quarters.

24. Responsibility For Water Rents

The owner of any premises which is supplied with district water shall be liable for charges of the water used or other expenses in connection with such water service as provided herein. When there are two (2) or more tenants occupying a property equipped with only one (1) meter, the water rent shall be billed and collected directly from the property owner and in no case from the tenant.

25. Buildings With Multiple Meters

In any building with multiple meters, there shall be a main water shutoff just inside the wall and individual shutoffs for each meter in the building. It shall be the responsibility of the owner to provide access to read meters.

26. Penalties For Offenses

Any persons or person, firm or corporation violating any of the provisions of these rules, regulations and ordinances hereby enacted shall, upon conviction, be fined a minimum of twenty-five dollars (\$25) and a maximum of two hundred fifty dollars (\$250) or imprisoned in the county jail for not more than fifteen (15) days, or be both so fined and imprisoned. These rules and regulations and any ordinances pertaining thereto may also be enforced by injunction or by any other remedy permitted by law.

27: Enlargement of Service

When an owner or tenant requires more water than the existing water pipe can deliver the property owner shall pay the cost of the enlargement, modification or replacement of said waterline from the water main to the building

28: Repair and Maintenance of Lines

No person or entity, other than Water District authorized personnel, shall attempt to dig up or repair any waterline at any time.

29: Filling of Swimming Pools

No swimming pools shall be filled from any hydrant within the water district.

30: Water Shortage Measures

In the event of a major break in a water main or drought condition that depletes the district water levels, the Town of Henderson Town Board may in its discretion order a declaration of water conservation. The Town Board shall establish times for restrictions on the use of water and may among other restrictions prohibit the use of water to wash cars, driveways, homes or to water gardens, shrubs, and flowers or restrict the filling of swimming pools, etc. The Town may for proper cause issue a "boil water" advisory through the media which "boil water" advisory may stay in effect until such time as the County/State Department of Health has declared the water safe to use.

31: Schedule of Charges

In addition to any and all other fees and charges, every person who shall be supplied or whose property shall be supplied water by the District shall pay water rent for the water supplied. The water rents shall be as listed in "Exhibit A".

A. Outside District rates shall be the same as Inside District Rates.

B. Water bills which remain unpaid for thirty (30) days after the billing date shall have an additional 10% interest charge assessed on the balance due for the current quarter. Bills that remain unpaid as of October 1 of each year may be charged by the Town as special assessments and collected as same.

C. Where meters are removed and service terminated at request of owner, no re-installation of meter and/or restoration of service shall be made until all unpaid water bills or charges, which have not been levied as a special assessment pursuant to Sub-section (B) above, have been paid in full to the Town.

32: Lease Agreements AND Truck Fill Station

Per resolution 2012-05-02-53 ... Water District #1 and Water District #2 shall share equally any revenue obtained from renting space on the water tower and any revenue obtained from the truck station.

EXHIBIT A

Town of Henderson

Water District 1 and 2

This page was modified on June 15, 2010, September 6, 2012

Water rates are based on one (1) Equivalent Dwelling Unit.

Water District 1

Beginning March 15, 2010 - Quarterly

- 1) Metered services
 - \$ 92.00 – Loan Charge (1 EDU)
 - 33.00 – Operation and Management Charge (O & M)
 - \$125.00 - Total for up to 12,500 gallons of water
 - If exceed 12,500 gallons of water, additional charge is \$5 per 1,000 gallons
- 2) Unmetered parcels
 - \$92.00 – Loan Charge (1 EDU)
- 3) Vacant
 - \$46.00 – Loan Charge (50% of an EDU)

Water District 2

Beginning September 6, 2012 – Quarterly Charges

- 1) Metered services
